

Vpn I2p mikrotik windows

Passo um crie um pool

```
1 ip pool/add
2
```

Crie um profile

The screenshot shows the 'Profiles' configuration window in Mikrotik WinBox, specifically the 'General' tab for a profile named 'profile1'. The window has a title bar with 'Profiles > profile1' and standard window controls. Below the title bar are tabs for 'General', 'Protocols', 'Limits', 'Queue', and 'Scripts'. The 'General' tab is active and contains the following fields and options:

- Comment:** An empty text input field.
- Name:** A text input field containing 'profile1'.
- Local Address:** A dropdown menu showing '10.10.1.1' with a minus button to its right.
- Remote Address:** A dropdown menu showing 'I2tp' with a minus button to its right.
- Remote IPv6 Prefix Pool:** A button with a plus sign.
- DHCPv6 PD Pool:** A button with a plus sign.
- Bridge:** A button with a plus sign.
- Bridge Port Priority:** A button with a plus sign.
- Bridge Path Cost:** A button with a plus sign.
- Bridge Horizon:** A button with a plus sign.
- Bridge Learning:** A dropdown menu showing 'default'.
- Incoming Filter:** A button with a plus sign.
- Outgoing Filter:** A button with a plus sign.
- Address List:** A button with a plus sign.
- Interface List:** A button with a plus sign.
- DNS Server:** A button with a plus sign.
- WINS Server:** A button with a plus sign.
- Change TCP MSS:** Radio buttons for 'no', 'yes', and 'default' (selected).
- Use UPnP:** Radio buttons for 'no', 'yes', and 'default' (selected).

On the right side of the window, there are two buttons: 'Copy' and 'Remove'. At the bottom of the window are three buttons: 'Cancel', 'Apply', and 'OK'.

Em local Address coloque um ip que não esteja sendo usado

crie um secrets

One Session Per Host ☒

Allow Fast Path ☐

Cancel Apply OK

Agora configure no windows

These changes will take effect the next time you connect.

Connection name
vpn12tp

Server name or address
10.10.10.113

VPN type
L2TP/IPsec with pre-shared key

Pre-shared key
.....

Type of sign-in info
Username and password

Username (optional)
julia

Password (optional)
.....

Save Cancel

Server name or address → coloque o ip público do roteador

pre-shared key → coloque a chave ipsec secret

OBs: Para a navegação não sair pela matriz desative essa opção no tunel vpn indo em *adaptador → vpns → propriedades → networking → internet protocol version ipv4 → advance* desmarque "user default gateway on remote network"

mas agora terá que ser criado uma rota no windows

```
1 route add 10.10.2.1 255.255.255.255.0 192.168.1.254 -p
```

onde 10.10.2.1 é a interface Lan do mikrotik e 255.255.255.255.0 é a mascara de rede

e 192.168.1.254 é local address que o windows recebeu
